

Amendments to the Specification

Please replace the paragraph beginning on page 6, line 17, with the following rewritten paragraph:

The clamping itself, apart from using clamps, can be ~~realised~~realized by using two pieces of thick material (such as substrate) on each side of the device. The inertia of such a material will act as some kind of clamp, which should be particularly effective ~~as~~for a fast input signal or an input pulse ~~is concerned~~ supplied by a suitable device for providing such a signal or pulse.
